

## TECHNICAL SPECIFICATIONS

Model: SA248

Batch: ES01-000311/03/2026

Screen Size: 1.44 inches

Wireless Connectivity: Bluetooth 5.2 and Bluetooth 4.0

Compatible with: Android 8.0 and iOS 14 and above

Battery Type: 150 mAh Polymer Battery

Battery Capacity: 2 days depending on usage, settings, and external temperatures.

Charging Time: 2 hours

**Smart watch Charging voltage: 5V/150mA**

Charging Type: Wired Charger

Package Contents:

Smartwatch + Straps + Wired Charger + Manual

### **Material:**

Straps: Silicone

Main Module: ABS/Crystal

Charger: ABS

## ATTENTION

Some functions vary depending on your mobile phone's software version, which is normal.

### CAUTION

Avoid using chargers other than the one included with the watch  
Do not use a power adapter higher than 5V = 1A to charge the battery; otherwise, the circuit may burn out and it will not charge.

### WARRANTY INFORMATION

This product is covered by a two (2) year limited warranty from the original purchase date.

### COVERAGE:

This warranty covers defects in materials and workmanship under normal use, provided they are not caused by accident, misuse, negligence, unauthorized modifications, or commercial use.

### NOT COVERED

- Accidental damage, drops, impacts, or physical abuse.
- Exposure to liquids, moisture, or extreme environmental conditions.
- Improper use, connection to incompatible devices, or failure to follow the instructions in this manual

- Unauthorized disassembly, repair, or modification.
- Normal wear and tear, including scratches or loss of battery capacity over time.

#### HOW TO OBTAIN WARRANTY SERVICE

To submit a warranty claim, please contact our customer service department by email with your proof of purchase.

The warranty is valid only for the original purchaser.

This electrical product must not be disposed of with  
household waste.

It must be taken to a waste collection center for proper sorting, in  
accordance with local regulations.

Contact your local authority or distributor for recycling information.

The packaging material is recyclable. Dispose  
of the packaging in the appropriate container.

## WATCH COMPONENTS

a/ Charger

b/ Main Module

c/ Adjustable Strap

## ASSEMBLY

- Place the straps on the smartwatch's main module, ensuring they fit correctly.

- Using the metal pins located at the top of each strap, press down to create space to insert the metal rod into the watch and then attach the strap.

- Adjust the smartwatch around your wrist until you find a comfortable position and fasten the buckle

## CHARGING THE SMARTWATCH

Before first use, fully charge your smartwatch. It is recommended to keep the battery level above 20% whenever possible.

Lithium-ion batteries tend to degrade rapidly when subjected to extreme charging cycles.

Keeping the charge within moderate ranges helps prolong the battery life of your smartwatch.

To charge the device, insert the main module directly into the charging device and connect it to a USB charging port.

Ensure the device is properly seated to guarantee stable and safe charging.

## POWER ON AND CONNECTING

- Press and hold the right button for 3 seconds to power on the device.

- Download and install the HryFine app from the Apple Store or Google Play.

- You can also scan the included QR code to directly access the download

- Register and log in to the HryFine app.

- Once the HryFine app is downloaded, go to your mobile phone's settings and enable notifications for HryFine in the notifications access function. Without this, the app will not connect to the watch.

- Connect the Bluetooth on both your phone and your smartwatch by tapping the Bluetooth icon.

- To set up your smartwatch with the app, make sure no other device is paired, or you will need to remove it.

- You can connect your watch by clicking the following icon in the app, located in the top right corner. Then, select "Nesquik Watch" in Bluetooth.

- Once connected, you will see the watch icon in the app in green. This icon will also appear at the top of your watch screen next to the battery bar.

- When the "Nesquik Watch" device appears, select it, and it will connect automatically

## HOW TO USE THE SMARTWATCH

- Once you have successfully paired your smartwatch, you can directly access the app, where you will find all your activity data. The information updates automatically.
- Tap the button on the right to activate the screen and access the interface. When you want to enter a specific function, tap the screen. The screen will turn off automatically after 5 seconds of inactivity.

## PERSONAL INFORMATION

Configure your personal data in the app by tapping the "me" icon at the bottom.

## SMARTWATCH FUNCTIONS

The watch must be connected to your phone's data and the app settings must be enabled for it to function correctly.

- Time
- Notification management (Calls, SMS, WhatsApp, Telegram, etc.)
- Remote camera shutter
- Alarm
- Music control
- Watch face
- Calculator
- Hydration reminder
- Calendar
- Voice assistant
- Game
- Flashlight

## IMPORTANT SAFETY MEASURES

- **Not submersible:** Your smartwatch is not designed to withstand water. Avoid using it in the shower, while swimming, diving, or in any aquatic environment, whether in a pool or the sea. If the device accidentally comes into contact with water, dry it carefully with a soft cloth before putting it back on.
- **Avoid extreme conditions:** Do not expose the smartwatch to high humidity, sudden pressure changes, or excessively high or low temperatures for extended periods. These situations can damage internal components or cause leaks of flammable substances.
- **Wearing on the wrist:** Adjust the strap comfortably, without overtightening, and keep the area in contact with your skin dry. If you notice irritation, redness, or swelling, remove the device immediately and consult a healthcare professional.
- **Handling the device:** Do not attempt to open, puncture, crush, cut, or expose the smartwatch to heat sources. Any improper handling may damage it or create safety risks
- **Charging process:** Do not use a power adapter exceeding 5V = 1A to charge the device. Higher voltage or current may damage the internal circuitry and prevent the battery from charging properly
